Remember - Other than the "Essential" supplies on page 2, you don't need everything listed to make collage papers and your series of 16+ artworks.

Use what you already have and supplement with what feels inspiring to try.

View the "Suggested Supplies" and "Choose your color palette" videos first, as well as review the Collage Paper Library options listed on this list to decide which papers you want to create for your neutral, cool and warm papers. Five to ten types of papers for each color family is plenty, although if you have time and feel inspired, you can make many more!

Please note: Some of these supplies have affiliate links, which support the production of COLLAGE JOY without costing you anything more.
